

Be part of an amazing success story !

Sunresin New Materials was born 20 years ago from the will and dedication of two chemists who had a Passion for Separation of valuable products from solutions. These technologies are at the heart of many industrial processes from cleaning up water and making it drinkable, processing natural products so that they can be used as food ingredients or capturing and purifying metals to produce batteries. Out of this Passion resulted the creation of one of the global major ion exchange resin producers in the world. Offering to its customers globally not only the widest technology portfolio in the industry but also the most advanced equipment technologies to best use these great products. We are an innovation oriented high-tech enterprise which today remains the first and unique listed company in the Ion Exchange and Adsorbent Resin industry giving us the means to growth. In the last two years we have added three new major manufacturing units to meet the market demand. We are a team of 600 dedicated and passionate professionals and are looking for our:
